Profile Summary

I am a self-taught and passionate full stack web developer with hands-on experience in building modern web applications using the MERN stack. Skilled in both front-end and back-end development, I have completed multiple real-world projects and enjoy solving problems through clean and efficient code. Quick learner, detail-oriented, and a team player committed to continuous growth and innovation.

Technical Skills

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Next.js, Tailwind CSS, Bootstrap, Responsive Design
Backend	Node.js, Express.js, Python (Flask), RESTful APIs, JWT Authentication, Socket.io, TypeScript, Firebase
Database	MongoDB, Mongoose, MySQL, SQL
Tools & Others	Git, GitHub, Postman, VS Code, Linux (Basic), Cloud Deployment

Projects

FastChill (*Freelance*)

Live | GitHub

An e-commerce platform for an electronics parts shop selling AC components, washing machine parts, refrigerator spares, sensors, motors, and related products.

- Built with Next.js and TypeScript for a fast, SEO-friendly shopping experience.
- Implemented product catalogue, category browsing, and search functionality.
- Delivered as a freelance project with a fully responsive UI across all devices.

Career Connect (*Freelance*)

GitHub

A full-stack job portal designed for degree students, combining job listings with an Instagram-style social feed.

- Workers can register, browse job postings, and apply directly through the platform.
- Recruiters can post jobs and manage applications via a dedicated dashboard.
- Includes a social feed where users can share posts and images, similar to Instagram.
- Built with React (frontend), Python Flask (backend), and SQL for data storage.

OLX Clone

Live | GitHub

A fully functional marketplace application with product listing and search features.

- Built with React and Firebase.
- Implemented secure user authentication and authorisation using Firebase.
- Designed responsive UI for optimal user experience across devices.

Chat Application

GitHub

A real-time chat application with private and group messaging features.

- Developed using MERN stack and Socket.io.
- Implemented WebSocket-based communication using Socket.io.
- Created user authentication system with JWT.

E-Commerce Website

GitHub

A responsive e-commerce platform with product catalogue, shopping cart, and admin dashboard.

- Designed and developed using MERN stack.
- Implemented shopping cart, checkout process, and payment integration.
- Created admin dashboard for product and order management.

Netflix Clone

Live | GitHub

A recreation of Netflix's UI and functionality using React and TMDB API.

- Built with React.js and TMDB API.
- Implemented dynamic movie carousels and responsive design.

Inker *(Group Project)*

GitHub

A collaborative content publishing platform with rich post creation and user profiles.

- Built using MERN stack and Redux.
- Designed and implemented post creation and editing interface.
- Built user profile system with customisation options.

Experience

Full Stack Developer Trainee

May 2024 – May 2025

Prototype – Calicut

- Completed an intensive one-year full stack web development training programme.
- Built multiple real-world projects using MongoDB, Express, React, and Node.js.
- Gained hands-on experience with REST APIs, JWT authentication, and database design.
- Practised Agile development methodology and version control with Git.
- Successfully deployed full-stack applications to cloud platforms.

Education

Higher Secondary Education (Computer Science)

2021 – 2023

K.P.E.S. HSS – Kayakkodi

- Completed Higher Secondary Education focusing on Computer Science fundamentals, programming principles, and system design.
